About Your Study Plan

This Study Plan comprises the full spectrum of materials and resources available to a candidate. We encourage you to use the recommended resources to target preparation to your needs and goals.

There will be hyperlinks throughout this document. Please make sure that you visit the relevant pages to access all of the resources.

Your commitment to great teaching begins here. Your efforts will not only help you pass the test, but will also prepare you to become a successful teacher.

How to study:

ABCTE is committed to making sure you are the best possible teacher.

We will provide you with study tips to get ready for the exam and both the content and resources to review this material. It is your job to commit to preparing and stay dedicated while studying.

Think of the Snapshot below as an overview for what you need to know.

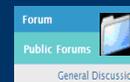

For more detail in each topic, review the exam [standards](#). The ABCTE exams are based on this blueprint, so consider this a syllabus for what you want to study.

ABCTE Teacher Forums:

Become a part of the ABCTE community by participating in our Teacher Forums today!

You can discuss the program, ask questions, and learn what other candidates have done to succeed in their classrooms.

<http://www.abcte.org/drupal/forums>

Physics Exam Snapshot

Time Allowed	240 minutes	
Format	Multiple-choice	
Number of Questions	125	
On-Screen Exhibits	Scientific calculator; Formula sheet	
Passing Score	Proficient: 258 Distinguished: 344	(The number of questions answered correctly is converted to a scaled score ranging from 0 to 500.)
Exam Summary	Content Domains	Approximate Percentage of Examination
	General Science Knowledge	6%
	Scientific Investigation	7%
	Classical Mechanics	24%
	Fluids and Thermodynamics	12%
	Electricity and Magnetism	24%
	Waves and Optics	15%
Modern Physics	12%	

About This Exam

The American Board for Certification of Teacher Excellence believes that highly skilled physics teachers should possess a comprehensive body of scientific knowledge that is research-based and promotes student achievement. The physics exam is a rigorous assessment of a candidate's knowledge and application of general physics. The topics assessed are characteristically covered in introductory college level physics courses, although some more advanced questions are included, as teachers must hold a more sophisticated understanding of physics content than that presented to their students.

How to use ABCTE Practice Tests

If you have chosen to use our practice tests, you may have already used the quizzes to get a better idea of where your strengths and weaknesses are. There are two full-length exams that we would suggest you use in *testing mode* as a mid-term and final to work on your timing and endurance. You can use them again in *explore mode* to identify distractors.

The Study Plan:

Your study plan includes direction on how to use ABCTE's resources. We also include recommended resources to aid in your mastery. The full description of these can always be found at: <http://www.abcte.org/drupal/teach/exam-preparation/physics>. You should also rate these resources whenever possible.

This plan was designed for a 9 month period (4 months for Professional Teaching Knowledge (PTK); 4 months for the subject matter; 2 weeks to take each test) in which most people are able to complete the program. Many have completed the program in a shorter amount of time.

Area of Study	Required Resource	Recommended Resource	Timeline
<ul style="list-style-type: none"> <input type="checkbox"/> Domain 1: Scientific Investigation <input type="checkbox"/> Domain 2: General Science Knowledge 	<ul style="list-style-type: none"> <input type="checkbox"/> Review the specific Physics standard http://www.abcte.org/drupal/teach/physics-standards The corresponding sessions can be found in your ABCTE Refresher Workshops at: http://abcte.org/drupal/courses/physics/index.html Scientific Knowledge <ul style="list-style-type: none"> <input type="checkbox"/> Scientific Method <input type="checkbox"/> Measurement and Analysis <input type="checkbox"/> General Science <input type="checkbox"/> Review 	<p>Web Resources</p> <ul style="list-style-type: none"> <input type="checkbox"/> Easyphysics.net <input type="checkbox"/> The Physics Classroom <input type="checkbox"/> Water Science for Schools <input type="checkbox"/> WebElements <input type="checkbox"/> Introductory Physics Notes <p>Books</p> <ul style="list-style-type: none"> <input type="checkbox"/> The Practical Geologist <input type="checkbox"/> Chemistry: Concepts and Problems: A Self-Teaching Guide <input type="checkbox"/> Physics Demystified : A Self-Teaching Guide <p>Other Media</p> <ul style="list-style-type: none"> <input type="checkbox"/> These and other resources can be found at: http://www.abcte.org/drupal/teach/exam-preparation/Physics 	<p>{Time}</p>

Your Notes:

Note: The resources recommended outside of the ABCTE program are often freely accessible online or can be found in your library. To ease your search we have hyperlinked them.

Study Tip:

One effective way of using the practice quizzes is to look at the incorrect answer choices before looking at the correct explanation to see if you can understand why those options are wrong. If you can understand how a test maker uses distractors, you will be able to eliminate wrong answer choices faster on test day.

Area of Study	Required Resource	Recommended Resource	Timeline
<input type="checkbox"/> Domain 3: Classical Mechanics <input type="checkbox"/> Topic 1: Kinematics and Dynamics <input type="checkbox"/> Topic 2: Work, Energy, Power and Momentum <input type="checkbox"/> Topic 03: Rotational Motion <input type="checkbox"/> Topic 04: Universal Gravitation	<input type="checkbox"/> Review the specific Physics standard http://www.abcte.org/drupal/teach/physics-standards The corresponding sessions can be found in your ABCTE Refresher Workshops at: http://abcte.org/courses/drupal/physics/index.html Classical Mechanics <input type="checkbox"/> Kinematics <input type="checkbox"/> Dynamics I <input type="checkbox"/> Dynamics II <input type="checkbox"/> Energy and Work <input type="checkbox"/> Momentum and Impulse <input type="checkbox"/> Angular Kinematics and Dynamics <input type="checkbox"/> Angular momentum and Rotational Kinetic Energy <input type="checkbox"/> Universal Gravitation and Kepler's Law <input type="checkbox"/> Gravitational Potential Energy <input type="checkbox"/> Motions of the Sun and Moon <input type="checkbox"/> Review	Web Resources <input type="checkbox"/> ABCTE Physics Exam Formulas and Constants <input type="checkbox"/> Regents Exam Prep Center: Physics Mechanics, Kinematics Books <input type="checkbox"/> Engineering Mechanics, Dynamics <input type="checkbox"/> Conceptual Physics with Practicing Physics Workbook Other Media <input type="checkbox"/> These and other resources can be found at: <input checked="" type="checkbox"/> http://www.abcte.org/drupal/teach/exam-preparation/Physics	{Time}

Your Notes:

"I can give children the inspiration and encouragement to confront their own challenges, surpass negativity and persevere....Without this program, I wouldn't have had the opportunity to pursue teaching."

-Traci Brown, ABCTE Teacher, FL

Testing on the Computer:

This may be your first time taking a test on a computer. On average, people read 20% slower on a screen vs. paper. Because of this and other issues, practice as much as you can on the computer to become comfortable working in that environment.

Familiarity with the test and its standards will go a long way towards your ABCTE success.

The online practice tests are great practice to get a feel for the testing environment.

We love to highlight ABCTE teachers in local newspapers. Not only does this provide publicity for a potential job search, it can also help highlight your school as one that is committed to providing students with the best possible teacher. Visit <http://www.abcte.org/get-involved/share-your-story>.

Your Notes:

Study Tip: Use a science survey text

A basic survey text on chemistry like Biology textbooks or the Idiot's Guide to Biology is recommended as a starting point. If you have another survey book from college, or you have access to a different text from your library, that is perfectly fine. It is important that you have access to a survey book because it will assist in covering the various domains of the exam.

Study Tip: Websites like Wikipedia and other unverified sources of information are *NOT* a good source of study. Much information found on the World Wide Web consists of unverified sources. Stick to verified sources with full citations. Many resources selected for study by our experts can be found on ABCTE's resource pages.
